# CONVENTIONS USED IN THIS MANUAL

**NOTATION**                      **DESCRIPTION**

*nonitalics*                      Words in syntax statements which are not in italics must be entered exactly as shown. Punctuation characters other than brackets, braces and ellipses must also be entered exactly as shown. For example:

EXIT;

*italics*                              Words in syntax statements which are in italics denote a parameter which must be replaced by a user-supplied variable. For example:

CLOSE *filename*

[ ]                                      An element inside brackets in a syntax statement is optional. Several elements stacked inside brackets means the user may select any one or none of these elements. For example:

$\left[ \begin{array}{c} A \\ B \end{array} \right]$       User *may* select A or B or neither.

{ }                                      When several elements are stacked within braces in a syntax statement, the user must select one of those elements. For example:

$\left\{ \begin{array}{c} A \\ B \\ C \end{array} \right\}$       User *must* select A or B or C.

...                                      A horizontal ellipsis in a syntax statement indicates that a previous element may be repeated. For example:

[, *itemname*]...;

In addition, vertical and horizontal ellipses may be used in examples to indicate that portions of the example have been omitted.

A shaded delimiter preceding a parameter in a syntax statement indicates that the delimiter *must* be supplied whenever (a) that parameter is included or (b) that parameter is omitted and any *other* parameter which follows is included. For example:

*itema*[, *itemb*][, *itemc*]

means that the following are allowed:

*itema*  
*itema, itemb*  
*itema, itemb, itemc*  
*itema, , itemc*

# CONVENTIONS (continued)

$\Delta$  When necessary for clarity, the symbol  $\Delta$  may be used in a syntax statement to indicate a required blank or an exact number of blanks. For example:

```
SET[(modifier)] $\Delta$ (variable);
```

underlining When necessary for clarity in an example, user input may be underlined. For example:

```
NEW NAME? ALPHA
```

In addition, brackets, braces or ellipses appearing in syntax or format statements which must be entered as shown will be underlined. For example:

```
LET var[[subscript]] = value
```

shading Shading represents the terminal's screen or key portions of an example

The symbol  may be used to indicate a key on the terminal's keyboard. For example, **RETURN** indicates the carriage return key.

**CONTROL** *char* Control characters are indicated by **CONTROL** followed by the character. For example, **CONTROL**Y means the user presses the control key and the character Y simultaneously.

## Platform 1P Overview

*by Myrna Allen  
Commercial Systems Division*

This Hewlett-Packard software release is based on MPE V/E (G.00.00) and is referred to as Platform 1P (G.1P.00). This release of the *Communicator* describes enhancements that have been added to our existing software products. These new enhancements further extend the functionality and performance of MPE V/E based HP 3000 systems.

### SYSTEM INFORMATION

With this MPE V/E release, our software release strategy has been updated to reflect the increased stability of the MPE V/E operating system and subsystem products. This new strategy offers you a Platform release approximately every 18 months, and a software release approximately every 6 months. These two releases offer you several distribution options, one of which will fit your needs.

### PERIPHERAL SUPPORT

The Hewlett-Packard Series 6400 Model 1300H DDS drive is now supported on MPE V/E. This drive is a standalone backup device which uses Digital Audio Tape (DAT). Since the DAT can store 1.3 Gigabytes, unattended backups are now possible.

## MPE V/E Software Release Strategy Changes

*Commercial Systems Division  
by System Release Team*

The MPE V/E MIT software release strategy has been updated to reflect the increased stability of the MPE V/E operating system and subsystem products. The strategy encompasses changes to the types of MPE V/E releases, their distribution frequency, length of support life, and naming and version conventions. The information below highlights these changes. Many of the program changes reflect inputs received from MPE V/E customers regarding ways to improve productivity of MPE V/E systems management. For further information, please contact your Hewlett-Packard account or support representative.

### MPE V/E RELEASE TYPES

Hewlett-Packard now provides two key types of software releases (Platforms and Software Releases). Customers can choose the release that is appropriate for their environment. The differences between these two releases are:

#### Platforms

=====

- Available approximately every 18 months
- Extended support life
- Focal release for availability of certain future products (new or enhanced)
- HP default for new system shipments (unless otherwise specified)
- Minor changes to previous Software Release

#### Software Releases

=====

- Available approximately every 6 months
- Standard support life
- Initial vehicle for releasing new and enhanced products.
- Can be ordered if specified for new system shipments

Platform Releases are tailored for those customers that desire extended support life from Hewlett-Packard and access to certain future products while minimizing operating system updates. The Platform Release integrates software defect repairs from previous Software Releases.

### DISTRIBUTION OPTIONS

The MPE V/E distribution strategy is based on how often your company would like to receive software updates from Hewlett-Packard. All Support Customers entitled to software updates will receive shipment of the Platform Release which is scheduled to ship approximately every 18 months. If your company

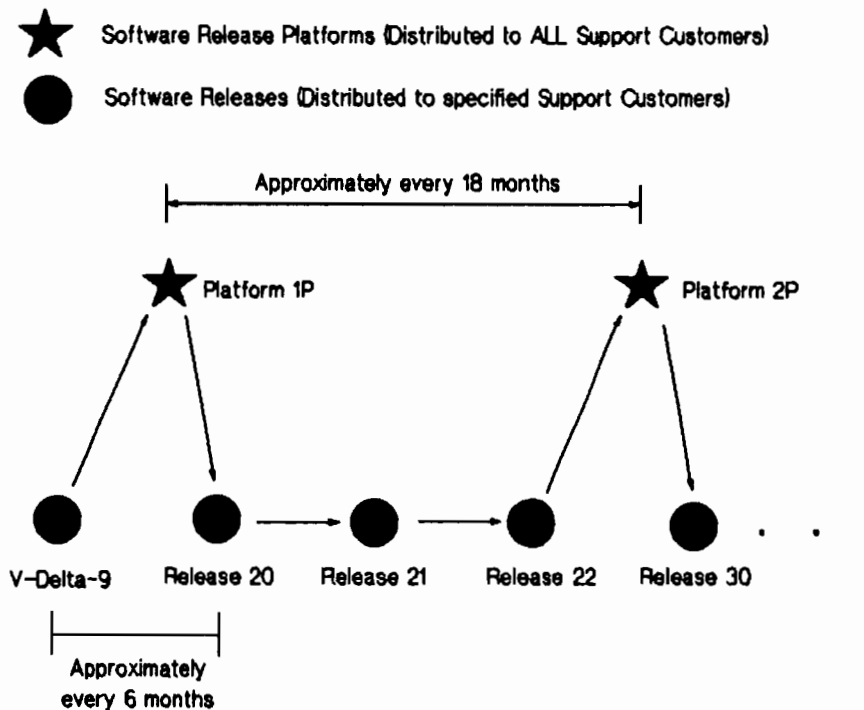

## System Information

requires more frequent updates, please work with your Hewlett-Packard representative to have your contract adjusted to reflect the needed deliverables. Available delivery options are:

1. Receive operating system updates approximately twice per year which includes one Software Release and the Platform Release.
2. Receive the Software Release just before the next available Platform Release in order to start in-house development or testing of the software. Also, you would receive the actual Platform Release.
3. Receive only the Platform Release as an update. Platform Releases will ship approximately every 18 months.

If for some reason, your company finds it desires a specific Software Release, your Hewlett-Packard support representative can obtain it upon request.

The figure below summarizes the release strategy, distribution strategy, and the revised naming convention.

## SUPPORT LIFE

The following describes the support life for our systems on the new software release strategy.

### Platform Releases

All Platforms have extended support life, approximately 30 months. This satisfies those customers that want to stay on a particular operating system for a longer period of time. It also gives our customers up to one year to update from one Platform release to the next.

### Software Releases

Software Releases are supported for approximately 12 months. Support life will be automatically extended to ensure that there is at least a 3-month window for customers to update from a Software Release to the next available Platform.

## REVISED SYSTEM RELEASE NAME & VERSION IDENTIFIER (VUF)

New System Release names and version identifiers (VUFs = Version, Update, Fix field) have been created to reflect the redefined software release strategy. In addition, the Operating System VUF, which used to be equivalent to the System Release VUF, will assume its own version identifier starting with Platform Release 1P. An example of revised MPE V/E naming conventions for future releases is as follows:

SYSTEM RELEASE NAME	SYSTEM RELEASE VUF	PRODUCT O/S VUF
V-DELTA-9	G.03.09	G.03.09
Platform 1P	G.1P.00	G.04.00
Release 20	G.20.00	G.05.00
Release 21	G.21.00	G.06.00
Release 22	G.22.00	G.07.00
Platform 2P	G.2P.00	G.08.00
Release 30	G.30.00	G.09.00
.		
.		

Any modification to a release or the Operating System will be reflected in its updated version identifier (V.UU.Ff). For a major modification, the "F" in the version identifier will be increased (e.g., G.2P.10). For a minor modification, the "f" in the version identifier will be increased (e.g., G.2P.11).

## DDS Tape Drive Supported on MPE V/E Systems

*by Mike Lim  
Commercial Systems Division*

The Hewlett-Packard Series 6400 Model 1300H DDS drive (P/N HPC1511A) is now supported on MPE V/E.

### PRODUCT FEATURES

The 1300H is a standalone tape backup device which uses Digital Audio Tape (DAT). Through the use of advanced helical scan technology, along with the Digital Data Storage format (DDS) that HP coauthored, the 1300H is able to store 1.3 Gigabytes of data on a tape one-third SMALLER than a standard audio cassette.

Since a single DAT can hold as much data as ten standard 6250 bpi tapes, unattended backups are now feasible. If 1.3 Gigabytes is insufficient, greater storage capacity may be achieved by using up to four DDS drives in conjunction with TurboSTORE V/E. Also, because data which previously required ten tape reels now fits on a single inexpensive DAT, substantial savings can be realized in the cost of media and storage.

Data integrity is enhanced by error correction routines which are built into the device. Furthermore, data on DDS tapes can be interchanged between MPE V/E and MPE XL systems.

### CONFIGURATION

DEVICE NAME:	HPC1511A
TYPE:	24
SUBTYPE:	6
RECORD WIDTH:	128
OUTPUT DEVICE:	0
ACCEPT JOBS/SESSIONS:	N
ACCEPT DATA:	N
INTERACTIVE	N
DUPLICATIVE:	N
INITIALLY SPOOLED:	N
AUTO REPLY:	Y or N
DRIVER NAME	HIOTAPE4
DEVICE CLASSES:	TAPE

# PRODUCT RELEASE INFORMATION

## MPE V/E PRODUCT RELEASES

The following table is a Historical/Current list of new products introduced for each MPE V/E version release for the HP 3000 Computer System. It also includes products added after this initial release of the Master Installation Tape (MIT).

MPE V/E Product Releases

V.UU.FF.	Name	Release	Product(s) Introduced/Added
E.01.00	V/R	R2548	V/P-Delta-1 equivalent HP DeskManager III
G.03.03	V-DELTA-3	R2827	Roll-in of V-Delta-2 NS/X.25 LINK (HP24405) LU 6.2 API (HP30253) MIGRATION PLANNING TOOL (MIGRMPT) SCOPE (HP50641) HP 9145 Cartridge Tape Drive*
G.03.04 SUBSYS VUF = G.C3.04	V-DELTA-4: Legally Evaluated by Dept. of Defense	R28C2	Roll-in of V-Delta-3 The Legally Evaluated DOD release SUBSYS VUF = G.A3.04 HPWORD SERVICES (HP27558) HPEDIT/V (HP30316) NSPAD (NSPAD)
G.C3.04	V-DELTA-4	R2840	Roll-in of V-Delta-3 HPWORD SERVICES (HP27558) HPEDIT/V (HP30316) NSPAD (NSPAD)
G.A3.05	V-DELTA-5	R2902	Roll-in of V-Delta-4 HP SRC/V (HP30234) OpenView NS DIAG Monitor (HP32051) OpenView NS Core Software (HP32052) OpenView NS PERF Monitor (HP32053)

## MPE V/E Product Releases (Continued)

V.UU.FF.	Name	Release	Product(s) Introduced/Added
G.B3.05	V-DELTA-5	GB305 (FOS)  GC305 - (SUBSYS) 11/89	Post MR build of SUBSYS to include:  BSP (HP32510) Resource Sharing (HP32597) Information Access (HP32596) Cooperative Services (HP32570) HP WordServices (HP27558) AGL (HP32122) HP DeskMon (HP27568) AdvanceMail Host (HP27504) New Wave Browsers (HP47950) HP Serial Network (HP32003A) Interactive Mainframe Facility (HP30250A) Network Services (HP32344A) Network Transport (HP32343A) NS X.25 3000/V (HP24405A) NS XL Server (HP30041A) OV Core Software (HP32052) RJE/3000 (HP30248A) SNA/LINK (HP30246A) SNA IMF (HP30247A) Workstation Configurator (HP30239A)
G.C3.05	V-DELTA-5	GC305 (FOS) GD305 - (SUBSYS)	Rolled the BND products to the version on G.B3.05 SUBSYS. All other products were carried over from the G.C3.05 SUBSYS.
G.A3.06	V-DELTA-6	cancelled	Not shipped - unsupported
G.03.07	V-DELTA-7	R2927	Roll-in of V-Delta-5 and V-Delta-6 HPWORDTEXT/PC (HP27566) HP GLANCE/V (HP50733) HP BRW-Desk/V (HP35365) HP Predictive (HP51467) HP Network Predictive (HP51468) HP Desk NewWave Browsers (HP47950)* AdvanceMail Host (HP27504)*
G.B3.07	V-DELTA-7	GB307 (FOS) GC307 - (SUBSYS)	Rolled in the version of HP DeskMon that had been retrofitted to V-Delta-5, and removed HP Silhouette.
G.B3.08	V-DELTA-8	R2944	Roll-in of V-Delta-7 HP CDINSTAL (HP32437) HP-IB CD-ROM (HPC1707) HP LaserRelease MICRO 3000RX

**MPE V/E Product Releases (Continued)**

<b>V.UU.FF.</b>	<b>Name</b>	<b>Release</b>	<b>Product(s) Introduced/Added</b>
G.A3.09	V-DELTA-9	R3010	Roll-in of V-Delta-8 HP X. 400/3000 Products (HP32056A) NewWave Office (B1720A) (Incorporation of General Release Patches)
G.1P.00	Platform 1P	R3035	Roll-in of V-Delta-9 Series 6400 Model 1300H DDS

\*Product has been retrofitted on this version.

## HP POWERPATCH MIT RELEASES

Hewlett-Packard now has a new software support service, HP PowerPatch. This service provides you with the ability to order current general-release FOS and workstation patches specifically designed for your system.

HP PowerPatch is provided to those of you who have AMS or RCS software support service agreement. With HP PowerPatch you will receive the most current set of patches available for your system.

If there is an HP PowerPatch tape available for your release, it should be ordered prior to performing the installation or update. Contact your Response Center. They will inform you if there is a current patch tape for the installation/update you are planning to perform. If there is an appropriate HP PowerPatch tape, you can install it at the same time as the installation/update. These patch sets will be revised periodically and are cumulative.

## SUPPORTED RELEASES

The following matrix provides information on the supported versions of MPE V/E. It lists the currently supported MITs and the SPUs they are supported on. The matrix also provides all known factory support termination dates. A version of MPE V/E will not have factory support after its support termination date.

### SUPPORTED MIT MATRIX

MITs	V.UU.FFs	Supported Systems	Support Termination Date
V/R	E.01.00	II, III, 30, 33	MAY 1, 1991

\* DOD version (G.03.04) will be supported indefinitely.

\*\* Support date dependent on actual first customer ship date of next platform or release.

# CATALOG OF USER DOCUMENTATION

SECTION

5

This section contains a comprehensive list of customer publications for the HP 3000 Computer System. The contents of the Subscription Services column indicate the update services provided for a particular manual:

- FOS = Available with the Fundamental Operating Software (FOS) subscription service.
- + = Available on all new subscription services (e.g. 32190A+S00).
- Q = Available on the Manual Update Services (MUS) level of support (e.g. 32190Q,S,T).
- S = Available on the Software Material Subscription (SMS) level of support (e.g. 32190Q,S,T).
- T = Available on the Account Management Support (AMS) level of support (e.g. 32190Q,S,T).
- 99 = Indicates availability on a specified category of the Manual Update Services (MUS) level of support (e.g. 99086B+Q00).

# READER COMMENT SHEET

HP 3000 Computer Systems

COMMUNICATOR 3000, Version G. 1P. 00 of MPE V/E (Platform 1P)  
Volume 3, Issue 1

32033-90208 AUGUST 1990

We welcome your evaluation of this manual. Your comments and suggestions help us to improve our publications. Please explain your answers under Comments, below, and use additional pages if necessary.

Is this manual technically accurate?  Yes  No

Are the concepts and wording easy to understand?  Yes  No

Is the format of this manual convenient in size, arrangement, and readability?  Yes  No

Comments:

This form requires no postage stamp if mailed in the U.S. For locations outside the U.S., your local HP representative will ensure that your comments are forwarded.
